

Statement from the Katter Australia Party

The KAP believe the NDIS is one of the few good things Government has done in the last two decades.

KAP MPs if elected will vote to protect the NDIS and support for participants.

There appears to be extreme waste with the implementation of some aspects of the NDIS.

In one anecdotal case, a participant in Far North Qld had experts flown up from Brisbane to assess their needs for a lift to be installed in their house.

The experts got numerous things wrong and had to be flown up and back again.

If we can have local community-based service providers, this would save funds that could be allocated to participants plans and not wasteful travel and administration costs.

The KAP also strongly believes there shouldn't be an age cap on NDIS participants.
